

# SIGNODE **MODULEX**

## Modular Compression Strapping Station

The industry's proven favourite  
with advanced MD200 strapping heads and edge protection applicators

### Modular configuration with a range of options

**Truly Modular System** – designed for easy configuration and quick installation, plus retrofit option to suit changing requirements.

**Four Chute Matrix** – enables up to 256 possible strap configurations in cross-strapping mode, to provide the optimum strapping solution.

**Strap Auto-feed System** – every single strap cycle is monitored to ensure the highest possible machine availability, with minimal strap wastage.

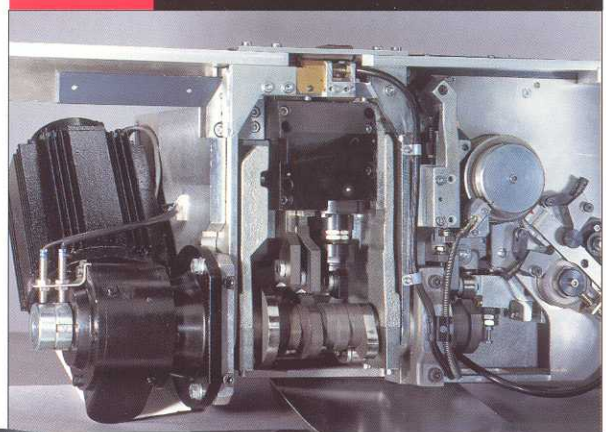

**Quick-change Strap Dispensers** – enable rapid change over of strap coils for maximum uptime.

**MD200 Strapping Heads** – all adjustments are factory-set. Highly durable components provide long operational life, minimise maintenance and deliver extremely low cost of ownership.

**Optional Modules** – a wide range of material handling components and edge protection applicators is available.

**Maximum Safety** – full CE and GS safety certification, plus numerous safety features for total operator protection.

**Secure the productivity potential**

MODULEX is Signode's approach to compression strapping. With state-of-the-art MD200 strapping heads, Auto-feed jam-resistant technology and driven quick-change strap dispensers, machine availability is what comes first. Second commitment on Signode's part is lowest cost of ownership. MD200 strapping heads have no clutches that wear, but a statically controlled direct-drive multi-motor system. Factory-set adjustments and high durability

components add to keeping maintenance to a minimum. Auto-feed makes sure that strap is not unnecessarily wasted. Growing with our customers and the corrugated industry in general is Signode's third aim. That's why MODULEX is modular, so that we can retrofit equipment if and when the need arises. That's why we use components from multi-national suppliers to guarantee ease of maintenance on a global scale.
