

SIGNODE RCNS2

Pneumatic Sealer

for use with 19 mm, 25 mm and 32 mm Steel Strapping

Features and Benefits

Lightweight – at less than 3kg, the RCNS2 is one of the lightest tools in its category.

Easy Tool Removal – the air powered piston closes and opens the jaws ensuring the tool comes off the seal quickly and easily.

Ergonomically Designed – light weight and ergonomically designed handle make the RCNS2 simple to use.

Durability – redesigned jaws, side plates and notches made of high grade tool steel ensures the RCNS2 performs efficiently even in the toughest applications.

Speed – the only tool of its kind to use air to move the piston in both directions, giving the RCNS2 the shortest cycle time in its class.

Reliability – tool design eliminates small wear parts for maximum reliability.

SIGNODE RCNS2 Pneumatic Sealer

for use with 19 mm, 25 mm and 32 mm Steel Strapping

Design, function and operation

The Signode RCNS2 is the fastest, most durable pneumatic sealer available – ideally suited to heavy-duty applications where reliability is paramount. The RCNS2 combines robustness with light weight and is one of the lightest tools in its category. This combination of light weight and an ergonomic design also makes the RCNS2 one of the most comfortable and easy to operate tools for operators to use.

Lightweight ergonomic design

With its light weight and ergonomically designed handle, the RCNS2 is extremely easy and simple for operators to use.

Reliable and durable

Robust jaws, side plates and notchers made of tough tool steel ensures long term reliability in the most demanding applications.

Faster cycle time

The only tool to use air to move the sealing piston in both directions, the RCNS2 offers the shortest cycle time in its class.

Speed of operation is another key advantage – thanks to a unique design that uses air to move the sealing piston in both directions. This feature gives the RCNS2 the shortest cycle time in its class and ensures it comes off the seal easily.

With no small wear parts and a simple yet extremely tough jaw mechanism, the RCNS2 also offers reliable performance, low maintenance and reduced operating costs.

Simpler operation

The use of compressed air to close and open the jaws also ensures the tool comes off the seal quickly and easily.

Easier, low cost maintenance

The simple, robust design has no small parts to wear out providing easier, low-cost servicing requirements.

Dimensions and Performance

Weight	2.9 kg
Overall length	260 mm
Width	120 mm
Height	275 mm

Strapping

The RCNS2 is a pneumatic sealer designed for use with 19 mm, 25 mm or 32 mm Apex and Magnus steel strapping in gauges from 0.63-0.9 mm in conjunction with Signode seals.

Apex is a regular duty strap, manufactured to close tolerances and is suitable for most packaging applications.

Magnus, our heavy duty strap, is a medium carbon heat treated steel strap designed for more demanding applications, where high impact resistance is required.

To provide the appropriate level of corrosion resistance, both strap types are available in a choice of three finishes – blued and waxed, black painted and waxed, and zinc painted and waxed.
